

On the move

Alpha

Reading your task, building the plan, keeping the pack on track

Beta

Breaking your goal into steps before the hunt begins

Scout

Ranging ahead to find ground truth — three running at once

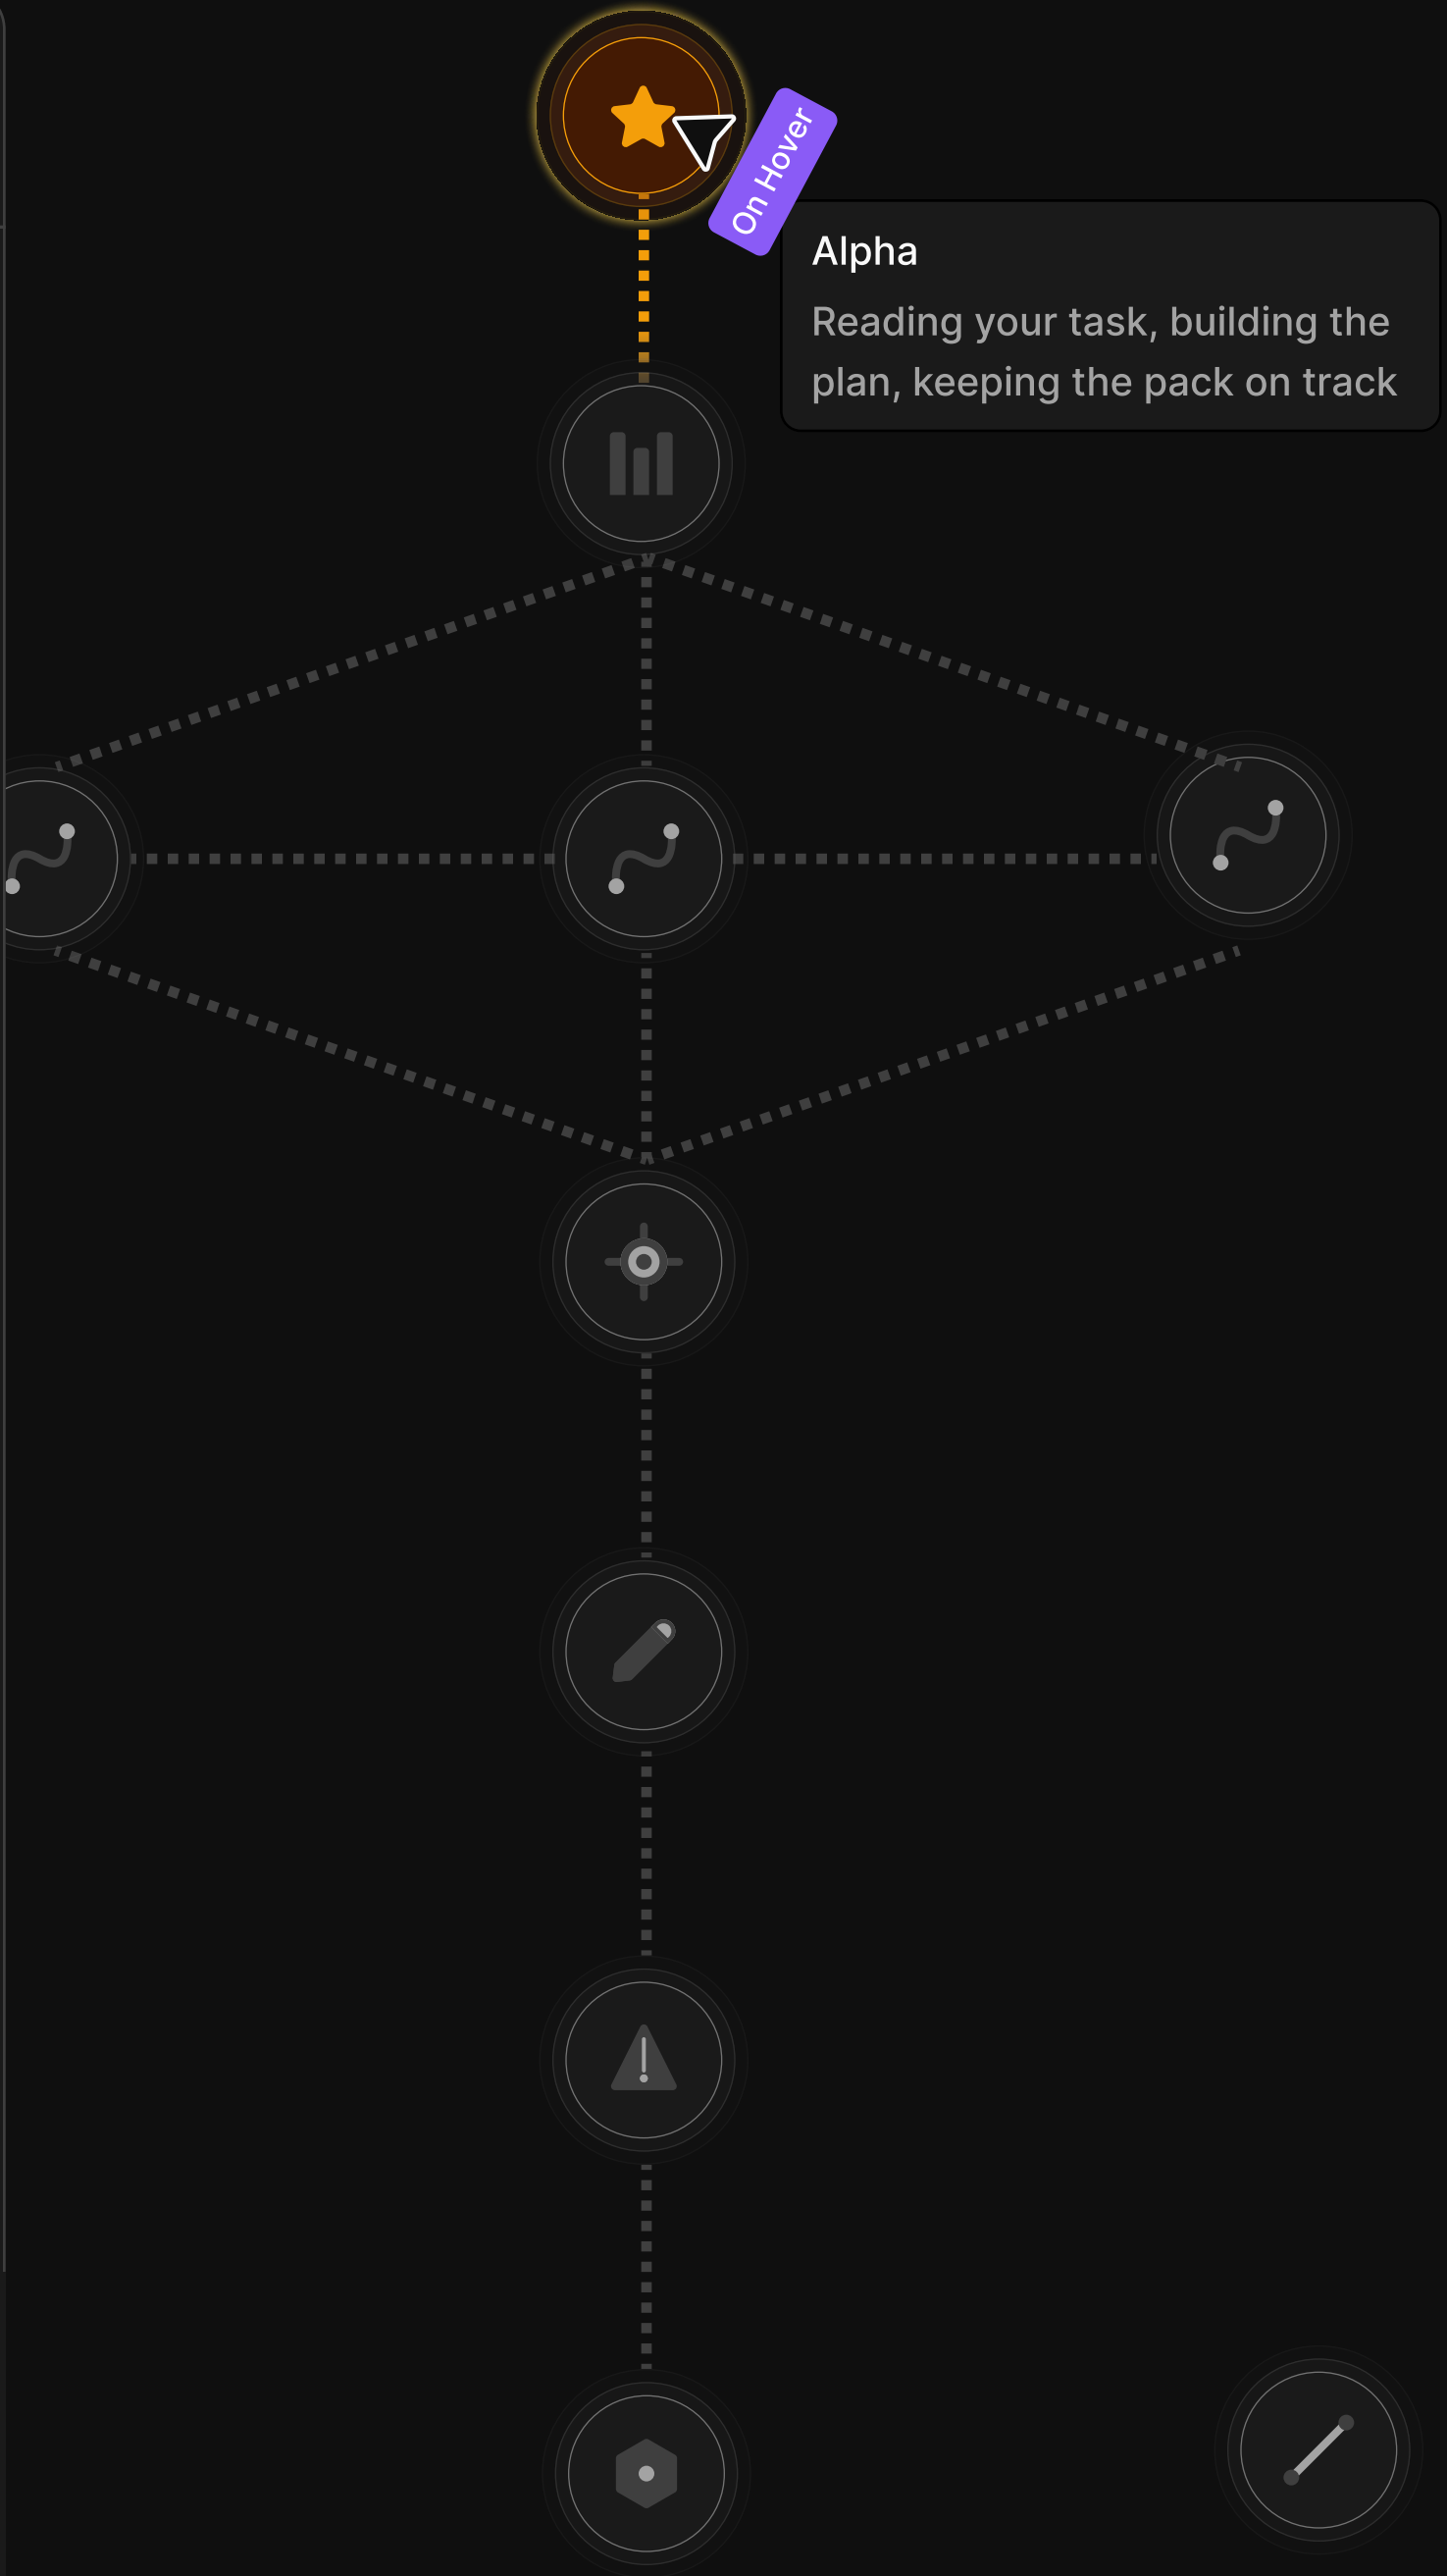

Tracker

Reading what the Scouts bring back and giving it shape

Howler

Alpha

Reading your task, building the plan, keeping the pack on track

Verify this claim: Nigeria has over 5 million active BNPL users as of 2025. Write me a short fact-checked article with sources.

Here's how I'll hunt this down.

I'll have the Qwen voice model transcribe the recording first — that becomes the ground truth the whole pack works from. Three Scouts will then range in parallel: one checking each major claim against primary sources, one pulling background on the people mentioned, one searching for any conflicting reports.

Tracker will cross-reference everything and flag where the numbers don't agree. Howler will write the article. Sentinel will challenge any claim Howler makes that isn't traceable back to a Scout's finding.

Conflicting data hold

The Scouts came back with conflicting figures on this one.

The recording says 5M users. CBN's official report says 2.1M. EFINA's 2025 survey says 3.4M.

- 1 Report all three figures and flag the discrepancy
- 2 Use only the verified figures — CBN and EFINA
- 3 Lead with the discrepancy as the story itself
